Chorus

When you are here with me  
The world looks very differently  
A place where only you and I can go  
This place where our imaginations soar  
A place that only you and I could ever really know  
This place where only you and I can go

Verse 1

Is that place where we go  
The same place for you as I; Do you know?  
That place where I've only ever found you  
A place where I feel safe and loved when I'm around you  
Do you feel safe when you're, there, in that place with me?  
Is Our Place the same loving place for you like it is for me?

Chorus

When you are here with me  
The world looks very differently  
A place where only you and I can go  
This place where our imaginations soar  
A place that only you and I could ever really know  
This place where only you and I can go

Bridge

I'm lost without you by my side  
I'm here in the place, the only place, where I can hope to find, you  
There, in the place where you were always on my mind  
For me you were always someone very real  
The one I felt came, was there, to only be with me  
Were you ever, here, were you ever, there, were you ever really in love with me?

## Verse 2

Is that place somewhere you still want to go?  
Is it me whom you really want, now, to know?  
Was it me you fell in love with, then, I still do not know  
Do I stay, now, take a chance that it's you I'll find, here, that you'll never go?  
When I look for love is it love that's on your mind?  
You're, here, in Our Place, now; Now, I know you're really, truly mine.

## Chorus

When you are here with me  
The world looks very differently  
A place where only you and I can go  
This place where our imaginations soar  
A place that only you and I could ever really know  
This place where only you and I can go
